INTRODUCING OUR ALL-NEW FORTUNE FTH102 SPREAD-AXLE TRAILER TIRE

FEATURES & BENEFITS:

- **Advanced Tread Compound:** Equipped with an optimized tread compound, specifically engineered to withstand the wear and tear demands of spread-axle trailers.
- **Enhanced Shoulder Design:** An arc shoulder design that provides more protection with even dispersion of lateral forces, safeguarding against abrasion.
- **Stability-Oriented Shoulder Groove:** With a big angle zigzag design, the shoulder groove bottom provides unmatched stability for the shoulder pattern blocks. Expect more from fatigue and tear resistance, guaranteeing consistent high performance.
- **Superior Stone Ejector and Gradient Grooves:** The four grooves incorporate a stone ejector system and gradient design, reducing tread cap damage and increasing the potential for tire retreading.

- **High-Load Handling Capability:** Engineered with a big-bead filler and high-strength rim cushion, the FTH102 seamlessly handles the high-load applications of spread-axle trailers and resists the significant lateral forces encountered during spread-axle turns.

WARRANTY INFO

All Fortune TBR tires come with a 2 retread guarantee.
